

I am seeking opportunities where I can help customers realize the value of cloud, data, and AI platforms while reducing delivery risk. My strength is turning complex technical and business needs into practical, repeatable solutions that customers can adopt with confidence. Below is a summary of the expertise and experience I would bring to this work:

I am a hands-on technology leader with extensive experience in software engineering, enterprise architecture, data architecture, and cloud solution delivery. I lead the design and implementation of cloud solutions that help customers adopt Azure, Fabric, AI, and data platforms with confidence.

I have deep expertise in infrastructure, data and AI platforms, and application development, combined with systems thinking and pragmatic leadership. In my 9.5+ years at Microsoft, I have led 60+ customer engagements across High Tech, Financial Services, Telecom, Government, Healthcare, Retail, and Pharma, consistently exceeding expectations.

I hold two U.S. patents for innovation in wireless applications, smart messaging, and logging. I am also a published author with 12 GitHub repositories and one article on the Microsoft Azure Architecture Center.

Experience Summary:

- 9.5 years at Microsoft, leading customer engagements and open-source solution accelerator delivery:
 - ✓ Led delivery and publication of 13 open-source projects, including high-utilization GitHub repositories used by Microsoft field teams, partners, and customers.
 - ✓ Led 60+ customer engagements across industries, guiding cloud migration, expansion, and optimization with a focus on simplicity, automation, and repeatable success. Representative customers include Bank of America, Sony Pictures, Anthem, PepsiCo, Walgreens, Eli Lilly, Neogrid, Coca-Cola, Heineken, EY, Chubb, MasterCard, the U.S. Army, and the Government of Canada.
- 5 years of consulting experience with TCS and NTT Data, serving representative customers including the U.S. Air Force, World Bank Group, New York Life, and Citibank.
- 5 years in enterprise architecture leadership roles at Truist, Bank of America, and Fiserv.
- 7 years of software engineering and architecture design at AT&T.
